HEALTHCARE SAFETYZONE

CLARITY

Our web-based application helps organizations improve patient safety by streamlining risk management and quality improvement processes, enhancing daily workflows for everyone involved!

EASY ACCESS

Accessible from any smart device, our app eliminates user limits and license agreements, ensuring seamless access for everyone.

- Choose from prebuilt modules or work with our expert implementation team to create exactly what your organization needs
- Edit content anytime during or post-implementation, either independently or with support

SECURE CONTROL

Administrators can manage user access, ensuring secure data handling and compliance with regulatory requirements.

- Benefit from SSO and password expiration compliance
- Control information distribution, granting one-time access as needed
- Set deadlines, reminders, access logs, follow-up tasks, questions, in a centralized message board

EFFICIENT REPORTING

Submit reports in under 4 minutes using our intuitive interface that requires no technical expertise. Proactively manage risks and incidents.

- Benefit from proactive risk management and incident reporting
- Add or modify data elements anytime
- Use the system for various data collection needs, including patient safety events, clinic closures, drills, advanced RCA, peer reviews, IT/building maintenance, and more

DATA ANALYSIS

Identify trends, analyze data, and gain valuable insights, allowing for effective decision-making.

- Schedule automated regular reports or create adjustable templates
- Export graphs and charts to Excel or PDF for further analysis or presentation
- Leverage comprehensive analytics for real-time monitoring and streamlined processes

The Healthcare SafetyZone® empowers organizations to improve patient care by simplifying risk management, enhancing reporting, and providing insightful data analysis.
